## 2023 DREAM STREET TOUR

A European vacation is only a trip to Colleyville away. Take a walk through three marvelous mansions inspired by three distinct regions of the old country.

**HOMES OPEN FOR TOURING OCT. 7 - 29**

**Gateway operates on the premise that...  
You should never have to sacrifice  
quality for cost.**

We believe everyone should be able to afford quality care. That's why an MRI with us costs up to 400 percent less than it would at a hospital. Plus, our services are in-network with all major insurance carriers.

Pain can make today feel like your worst day. Gateway aims to change by offering our patients fantastic service, impeccable quality, and reduced costs.

## Imaging You Can Trust

**Gateway Diagnostic Imaging offers accessible, affordable, easy, high-quality diagnostic imaging whenever you need it.**

No one expects to get hurt or wake up in pain. But life happens—and Gateway Diagnostic Imaging is here to help. With same-day appointments and flexible early morning, evening, and weekend hours, we're always at your service, whether you're in need of an MRI, CT, X-ray, or ultrasound. Our 12 Dallas-Fort Worth locations and fast scan technology add convenience to busy lives.

**That's important because...**

**You can decide where you receive care.**

The local hospital isn't your only option. Patients can decide where they receive diagnostic imaging. Gateway's team of board-certified, fellowship-trained radiologists make us a trustworthy choice. We also offer state-of-the-art technology with 3T wide-bore MRI machines at each of our centers. A 3T wide-bore MRI is a stronger machine that allows for more accurate readings in less time; its larger size also makes it more comfortable and less claustrophobic. That doesn't mean it costs more, though.

**"With Gateway Diagnostic Imaging, I know my patients will be getting high-quality images at a competitive cost that are read by skilled and experienced radiologists."**

— Sheena Black, MD, Orthopedic Surgeon
